WORK EXPERIENCE

Software Engineer

OptimaGeeks

06/2022 - Present

Lahore, Pakistan

Achievements/Tasks

- Proficient in debugging and troubleshooting code to identify and resolve issues efficiently, ensuring optimal software performance.
- Successfully tackled new tasks and projects, adapting quickly to learn and implement new technologies and coding practices.
- Demonstrated expertise in code maintenance, ensuring software remains up-to-date and functional over time.
- The "Globexs Project | immomarket | asboestates | auctionimmo" is a real estate platform that allows property owners to rent their properties, features a blog section, and highlights top destinations for property sale in Spain, Belgium, and the Netherlands.
- I developed Wordpress WooCommerce functionalities for eBook sales and school license subscriptions, integrating a dynamic flipbook feature for interactive browsing and easy downloads.
- Proficient in WordPress plugin and theme customization, resolving bugs, and optimizing websites for performance and usability. Skilled in implementing tailored solutions to enhance functionality and user experience.

Associate Software Engineer

Brown Tech Int.

08/2021 - 06/2022

Lahore, Pakistan

Achievements/Tasks

- I led the development of the View Home System project, where I implemented user registration, super admin login, and robust role and permission management for sub-admins.
- Users input shipping data, receive email invoices, and proceed post-admin approval. Payment options include PayPal, Stripe, and custom methods. This project highlights my expertise in user-focused web development and communication-enhancing features.
- In the Tatum Gaming Hub project, I developed a user registration and login system, providing both users and administrators access. Users can seamlessly create Tatum API BNB accounts during registration.

PHP Developer

Arsynce technology

02/2021 - 08/2021

Lahore, Pakistan

Achievements/Tasks

- Designed and developed user authentication systems, including login and registration modules, from the ground up using core PHP, ensuring robust security and user-friendly experiences.
- Created a custom website from scratch, translating design concepts into functional web pages, and optimizing them for performance.
- Worked closely with cross-functional teams to gather project requirements, provide technical insights, and meet project deadlines effectively.

EDUCATION

BS Software Engineering

Virtual University of Pakistan

03/2017 - 04/2021

Lahore, Pakistan
