WORK EXPERIENCE

Software Engineer

OptimaGeeks

08/2022 - Present

Lahore, Pakistan

Achievements/Tasks

- Proficient in debugging and troubleshooting code to identify and resolve issues efficiently, ensuring optimal software performance.
- Successfully tackled new tasks and projects, adapting quickly to learn and implement new technologies and coding practices.
- Demonstrated expertise in code maintenance, ensuring software remains up-to-date and functional over time.
- Leveraged Chart.js for creating dynamic and interactive data visualizations, improving data presentation and user engagement.

Associate Software Engineer

Brown Tech Int.

08/2021 - 06/2022

Lahore, Pakistan

Achievements/Tasks

- I led the development of the View Home System project, where I implemented user registration, super admin login, and robust role and permission management for sub-admins.
- Users input shipping data, receive email invoices, and proceed post-admin approval. Payment options include PayPal, Stripe, and custom methods. This project highlights my expertise in user-focused web development and communication-enhancing features.
- In the Tatum Gaming Hub project, I developed a user registration and login system, providing both users and administrators access. Users can seamlessly create Tatum API BNB accounts during registration.

PHP Developer

Arsynce technology

02/2021 - 08/2021

Lahore, Pakistan

Achievements/Tasks

- Designed and developed user authentication systems, including login and registration modules, from the ground up using core PHP, ensuring robust security and user-friendly experiences.
- Created a custom website from scratch, translating design concepts into functional web pages, and optimizing them for performance.
- Worked closely with cross-functional teams to gather project requirements, provide technical insights, and meet project deadlines effectively.

EDUCATION

BS Software Engineering

Virtual University of Pakistan

03/2017 - 04/2021

Lahore, Pakistan
